```javascript
//cart like count event
const heart = document.querySelectorAll('.fa-heart')
const likeCnt = document.getElementById('likecnt')

let cntheart = 0

heart.forEach((value) => {
    value.addEventListener('click', function () {
        cntheart++
        likeCnt.innerHTML = cntheart
    })

})

const cart = document.querySelectorAll('.fa-shopping-cart')
const CartCnt = document.getElementById('cartcnt')

let cntcart = 0
cart.forEach((value) => {
    value.addEventListener('click', function () {
        cntcart++
        CartCnt.innerHTML = cntcart
    })

})
```
